LABELLING AND SIGNAGE

See the list of available pics and safety signs:
www.elmetal.pl

Hard-wearing floor marking signs

Made from high-quality self-adhesive film with excellent adhesion (16 N/25 mm) and increased resistance to water, fats, oils, as well as low concentrated acids and bases.

The film is resistant to temperatures between -40°C and $+80^{\circ}\text{C}$. The signs are additionally protected with anti-slip film which minimises wear. The signs are resistant to sunlight.

As standard, the signs come in a circular shape with a diameter of 300 mm (prohibition and mandatory signs) or a triangle which is 300 mm high (warning signs).

FLOOR MARKING TAPES

Floor marking tapes

Flexible and durable floor marking system that is applied like tape and surpasses any other commonly used system. Our tapes can be used on dirty and oily floor surfaces, in dry and even subfreezing environments - at temperatures ranging from -40°C to $+40^{\circ}\text{C}$.

The tape is made up of PVC foil and an acrylic adhesive backing.

- quick and easy installation
- peel-and-stick application
- elimination of the downtime associated with stripe painting
- scuff resistant material that requires little or no maintenance
- easy removal in case of reconfiguration
