Reception

Cross Docking: Rapid classification of the material received from supplier to final client without affecting the daily process.

Put To Light: The most efficient system for sorting and distributing orders.

Process

Picking Cart: Facilitating the operation by minimizing displacements since items can be collected for several orders simultaneously.

Batch Picking: The perfect solution for chaotic storage methodology. Collection of products without classification by orders.

Pick To Light: Intuitive, fast and accurate selection of articles.

Shipping

Put To Light: The most efficient system for sorting and distributing orders.

Pick To Pack: Eliminate errors in packaging and shipping phase. No more incomplete shipments by mistake.

Pick To Light in your logistics.
